EXECUTIVE SUMMARY:

The UAE Cyber Security Council has observed Microsoft recently released security updates to patch critical vulnerability in the Edge browser.

TECHNICAL DETAILS:

On March 27, 2024, Microsoft released emergency security updates to address a critical vulnerability tracked as **CVE-2024-2883 (Chromium: Use after free in ANGLE)** in the Microsoft Edge browser. This vulnerability is reported to be actively exploited in the wild and poses a significant risk to users.

Successful exploitation of this vulnerability could allow an attacker to remotely execute malicious code on a vulnerable system. This could give the attacker complete control over the system, allowing them to steal data, install malware, or disrupt operations.

Fixed Versions:

- Microsoft Edge Stable Channel Version 123.0.2420.65
- Microsoft Edge Extended Stable Channel Version 122.0.2365.113

RECOMMENDATIONS:

The UAE Cyber Security Council recommends to update the Microsoft Edge browser to the latest version.

Kindly circulate this information to your subsidiaries and partners as well as share with us any relevant information and findings.

The UAE Cyber Security Council extends its appreciation for the continued collaboration.
