## EXECUTIVE SUMMARY:

The UAE Cyber Security Council observed that Microsoft released security updates to patch multiple vulnerabilities in the Edge browser.

## TECHNICAL DETAILS:

Microsoft recently released an update for the Microsoft Edge Stable Channel that incorporates the latest security updates from the Chromium project. This update addresses several vulnerabilities, including following three Microsoft Edge-specific vulnerabilities.

### Vulnerabilities Details:

- **CVE-2024-29986 (CVSS Score: 5.4):** This vulnerability is an information disclosure vulnerability specific to Microsoft Edge for Android (Chromium-based). An attacker could potentially exploit this vulnerability to disclose information from the system.
- **CVE-2024-29987 (CVSS Score: 6.5):** This vulnerability is an information disclosure vulnerability in Microsoft Edge (Chromium-based). An attacker could potentially exploit this vulnerability to disclose information from the system.
- **CVE-2024-29991 (CVSS Score: 5.0):** This vulnerability is a security feature bypass vulnerability in Microsoft Edge (Chromium-based). An attacker could potentially exploit this vulnerability to bypass certain security features.

### Fixed Versions:

- Microsoft Edge Stable Channel (Version 124.0.2478.51)

## RECOMMENDATIONS:

The UAE Cyber Security Council recommends to update the Microsoft Edge browser to the latest version.

Kindly circulate this information to your subsidiaries and partners as well as share with us any relevant information and findings.

The UAE Cyber Security Council extends its appreciation for the continued collaboration.
