EXECUTIVE SUMMARY:

The UAE Cyber Security Council has observed that ManageEngine released security updates to address a vulnerability in products; Password Manager Pro and PAM360.

TECHNICAL DETAILS:

Vulnerability Details:

- **CVE-2024-5546** | Base Score: 8.3 | Severity: High | SQL Injection Vulnerability
 - This vulnerability allows an adversary to execute custom queries, and access the database table entries using the vulnerable request. However, the dual encryption mechanism ensures that the access to sensitive information like passwords remains restricted.

Affected Versions:

- Password Manager Pro: Till 12430
- PAM360: Till 7000

Fixed Version:

- Password Manager Pro: 12431
- PAM360: 7001

RECOMMENDATIONS:

The UAE Cyber Security Council recommends updating the affected versions to the fixed or latest versions released by ManageEngine.

Kindly circulate this information to your subsidiaries and partners as well as share with us any relevant information and findings.

The UAE Cyber Security Council extends its appreciation for the continued collaboration.
