EXECUTIVE SUMMARY:

The UAE Cyber Security Council observed that Microsoft released security updates to patch multiple vulnerabilities in the Edge browser.

TECHNICAL DETAILS:

Microsoft has released security updates to address multiple vulnerabilities in its Edge browser. These vulnerabilities could potentially allow a malicious actor to execute arbitrary code on a vulnerable system.

This update fixes following Microsoft Edge-specific vulnerabilities:

- **CVE-2024-43489, CVE-2024-43496**-Microsoft Edge (Chromium-based) Remote Code Execution Vulnerability.
 - A Remote Code Execution vulnerability that could allow an attacker to execute arbitrary code on a vulnerable system.
- **CVE-2024-38221**-Microsoft Edge (Chromium-based) Spoofing Vulnerability.
 - A Spoofing vulnerability that could allow an attacker to trick users into clicking on malicious links or downloading malicious files.

Fixed Version:

- Microsoft Edge Stable Channel (Version 129.0.2792.52)
- Microsoft Edge Extended Stable Channel (Version 128.0.2739.90)

RECOMMENDATIONS:

The UAE Cyber Security Council recommends to update the Microsoft Edge browser to the latest version.

Kindly circulate this information to your subsidiaries and partners as well as share with us any relevant information and findings.

The UAE Cyber Security Council extends its appreciation for the continued collaboration.
