EXECUTIVE SUMMARY:

The UAE Cyber Security Council has observed Oracle released its Critical Patch Update (CPU), addressing multiple vulnerabilities in various products.

TECHNICAL DETAILS:

Oracle released its Critical Patch Update (CPU), addressing 198 CVEs through 334 security updates across 28 product families. This update is significant as it includes 35 critical patches, representing 10.5% of the total updates. High-severity patches account for 44.6%, while medium-severity patches make up 39.5%.

Product Family Impact:

The following table outlines the number of patches per product family and the vulnerabilities that can be exploited remotely without authentication, detailed list of CVE-IDs and Impact is available [here](#).

Oracle Product Family	Number of Patches	Remote Exploit without Authentication
Oracle Commerce	100	81
Oracle Hyperion	45	12
Oracle Financial Services Applications	32	25
Oracle E-Business Suite	20	15
Oracle Communications Applications	18	1
Other Families	Various	Various

RECOMMENDATIONS:

The UAE Cyber Security Council recommends organizations should prioritize applying all relevant patches from the October 2024 CPU.

Kindly circulate this information to your subsidiaries and partners as well as share with us any relevant information and findings.

The UAE Cyber Security Council extends its appreciation for the continued collaboration.
