SQL Injection Vulnerability in ManageEngine ADAudit Plus

Tracking #:432316530

Date:19-11-2024

EXECUTIVE SUMMARY:

The UAE Cyber Security Council has observed a SQL Injection vulnerability in ManageEngine ADAudit Plus that could be exploited to execute malicious code on affected systems.

TECHNICAL DETAILS:

Vulnerability Details:

- **CVE-2024-49574**
- CVSS Score: 8.3 High
- An SQL injection vulnerability has been identified in the reporting functionality of ADAudit Plus. This vulnerability could potentially allow an authenticated attacker to execute malicious SQL queries, leading to unauthorized access to sensitive data within the ADAudit Plus database.
- Successful exploitation of this vulnerability could have severe consequences, including:
 - **Data Exfiltration:** Attackers could steal confidential information stored within the database.
 - **Data Modification:** Malicious actors could alter or delete critical data.
 - **System Compromise:** In some cases, attackers could gain unauthorized access to the underlying system.

Affected Versions:

- ManageEngine ADAudit Plus, versions prior to build 8123

Fixed Versions:

- ManageEngine ADAudit Plus build 8123 or later

RECOMMENDATIONS:

The UAE Cyber Security Council recommends to upgrade the affected versions to the fixed versions at the earliest.

Kindly circulate this information to your subsidiaries and partners as well as share with us any relevant information and findings.

The UAE Cyber Security Council extends its appreciation for the continued collaboration.
