## EXECUTIVE SUMMARY:

The UAE Cyber Security Council has observed that Microsoft released security updates to patch a vulnerability in the Edge browser.

## TECHNICAL DETAILS:

Microsoft has released a security update for the Microsoft Edge Stable Channel, incorporating the latest updates from the Chromium project. This update addresses a vulnerability that could allow attackers to exploit the browser and potentially compromise user systems.

### Vulnerability Details:

- CVE-2024-49041-Microsoft Edge (Chromium-based) Spoofing Vulnerability
- **CVSS Score 4.3 Medium**
- A spoofing vulnerability exists in Microsoft Edge (Chromium-based). An attacker could exploit this vulnerability by convincing a user to open a specially crafted malicious file or website, which could lead to information disclosure or other malicious activities.

### Fixed Version:

- Microsoft Edge Stable Channel Version 131.0.2903.86

## RECOMMENDATIONS:

The UAE Cyber Security Council recommends to update the Microsoft Edge browser to the latest version.

Kindly circulate this information to your subsidiaries and partners as well as share with us any relevant information and findings.

The UAE Cyber Security Council extends its appreciation for the continued collaboration.
