Security Updates - VMware Aria Automation
Tracking #:432316734
Date:13-01-2025

EXECUTIVE SUMMARY:

The UAE Cyber Security Council has observed that VMware has released security updates to address a server-side request forgery (SSRF) vulnerability in VMware Aria Automation.

TECHNICAL DETAILS:

Vulnerability Details:

- **CVE-2025-22215**
- CVSS v3 Base Score: 4.3
- Severity: Medium
- A server-side request forgery (SSRF) vulnerability exists in VMware Aria Automation. This SSRF vulnerability could allow a malicious actor with "Organization Member" access to enumerate internal services running on the host/network. This could potentially lead to unauthorized access to sensitive information or further exploitation of internal systems.

Affected Products and Versions:

- VMware Aria Automation versions 8.x
- VMware Cloud Foundation versions 5.x and 4.x

Fixed Versions:

- VMware Aria Automation 8.x: Upgrade to version 8.18.1 patch 1
- VMware Cloud Foundation 5.x and 4.x: Apply the patch referenced in KB 385294

RECOMMENDATIONS:

The UAE Cyber Security Council recommends to upgrade the affected versions to the fixed versions at the earliest.

Kindly circulate this information to your subsidiaries and partners as well as share with us any relevant information and findings.

The UAE Cyber Security Council extends its appreciation for the continued collaboration.
