**Critical Vulnerability in One Identity Manager**  
Tracking #:432316796  
Date:28-01-2025

## EXECUTIVE SUMMARY:

The UAE Cyber Security Council has observed a critical security vulnerability has been discovered in One Identity Manager, a widely used identity and access management solution.

## TECHNICAL DETAILS:

### Vulnerability Overview

- CVE ID: CVE-2024-56404
- CVSS Score: 9.9 (**Critical**)
- Type: Insecure Direct Object Reference (IDOR)
- Impact: Privilege escalation and unauthorized access to sensitive systems and data.

### Affected Versions

- On-premise installations of One Identity Manager versions 9.0.x to 9.2.1.

Not Affected:

- Cloud-based “On Demand” versions of One Identity Manager

### Resolution:

One Identity has created hotfixes for all impacted versions:

- 9.0.x LTS CU3
- 9.1x
- 9.2.x
- Upgrade to version 9.3, which is not vulnerable to this issue

## RECOMMENDATIONS:

The UAE Cyber Security Council recommends to applying the appropriate hotfix for the affected versions or upgrade to the latest version.

Kindly circulate this information to your subsidiaries and partners as well as share with us any relevant information and findings.

The UAE Cyber Security Council extends its appreciation for the continued collaboration.
