**Security Updates – Mozilla Thunderbird**

Tracking #:432317443

Date:04-07-2025

THE INFORMATION CONTAINED WITHIN IS THE PROPERTY OF THE CYBER SECURITY COUNCIL OF THE UNITED ARAB EMIRATES GOVERNMENT AND IS TO BE USED EXCLUSIVELY FOR INTELLIGENCE PURPOSES. IT MAY NOT BE USED IN ANY LEGAL OR PUBLIC MATTER WITHOUT THE EXPLICIT APPROVAL OF THE CYBER SECURITY COUNCIL

## EXECUTIVE SUMMARY:

The UAE Cyber Security Council has observed that Mozilla has released security updates for Thunderbird to address multiple high and moderate severity vulnerabilities. These vulnerabilities could allow attackers to crash applications or track users via a persistent browser UUID exposed by the WebCompat extension.

## TECHNICAL DETAILS:

### Vulnerability Details:

- **CVE-2025-6424: Use-after-free in FontFaceSet**
  - **Severity:** High
  - **Impact:** A use-after-free in FontFaceSet resulted in a potentially exploitable crash.
- **CVE-2025-6425: The WebCompat WebExtension shipped exposed a persistent UUID**
  - **Severity:** Moderate
  - **Impact:** An attacker who enumerated resources from the WebCompat extension could have obtained a persistent UUID that identified the browser and persisted between containers and normal/private browsing mode, but not profiles.
- **CVE-2025-6426: No warning when opening executable terminal files on macOS**
  - **Severity:** Moderate
  - **Impact:** The executable file warning did not warn users before opening files with the terminal extension. This bug only affects Thunderbird for macOS. Other versions of Thunderbird are unaffected.

### Fixed Versions:

- Thunderbird 140
- Thunderbird 128.12

## RECOMMENDATIONS:

The UAE Cyber Security Council recommends applying the security updates recently released by Mozilla.

Kindly circulate this information to your subsidiaries and partners as well as share with us any relevant information and findings.

The UAE Cyber Security Council extends its appreciation for the continued collaboration.
