## EXECUTIVE SUMMARY:

The UAE Cyber Security Council has observed that Apple has released security updates for iOS and iPadOS to address a vulnerability in the Notification Services component.

## TECHNICAL DETAILS:

Apple has released security updates for iOS and iPadOS to address a vulnerability in the Notification Services component. The issue could lead to unintended retention of deleted notifications, potentially exposing sensitive user information.

### Vulnerability Details

- **CVE-2026-28950 – Notification Services Logging Issue**
- A logging issue in the Notification Services component could cause notifications marked for deletion to be unexpectedly retained on the device. This may result in unintended data exposure. The vulnerability was addressed by improving data redaction mechanisms to ensure proper handling and deletion of sensitive notification data.
