## EXECUTIVE SUMMARY:

The UAE Cyber Security Council has observed that Adobe has released its June 2026 Security Updates addressing 123 vulnerabilities across 11 product families.

## TECHNICAL DETAILS:

Adobe has released its June 2026 Security Updates addressing 123 vulnerabilities across 11 product families, including Adobe Acrobat Reader, ColdFusion, Experience Manager (AEM), Experience Manager Forms, InDesign, InCopy, Dreamweaver, Substance 3D Sampler, Content Credentials SDK, Format Plugins, and Campaign Classic.

Of particular concern are two critical vulnerabilities in Adobe Campaign Classic (ACC), CVE-2026-48303 and CVE-2026-47938, both assigned a CVSS score of 10.0, the highest possible severity rating. Successful exploitation could allow unauthenticated remote attackers to achieve arbitrary code execution.

Adobe has stated that no active exploitation has been observed at the time of release; however, organizations should prioritize remediation due to the severity of the vulnerabilities and the potential for rapid weaponization.
