ADGM Academy Schools

In today's everchanging and complex economy, having stable financial systems and banks is the utmost priority of every country. The banking and finance sectors are backbones of economic growth, and so the School of Banking and Finance aims to progress the skills and knowledge of individuals who are either working professionals or are seeking employment in this industry.

With professional certifications and national qualifications offered, the school will address many topics in banking and finance including Securities & Investment, International Trade and Retail and Digital Banking.

Applying AI in Finance: Framework and Use Cases Professional Development Programme

This course will explore some of the main areas where AI is being applied to enhance the provision of financial services. The expert will discuss a variety of business cases from different verticals, including wealth and asset management, insurance, customer service, Robotic Process Automation (RPA), and fraud detection.

The business cases will be used to inform participants about the opportunities, challenges, and risks that accompany the deployment of AI in financial institutions. The course will also include a group project, where participants will work in teams to analyse the business case of a selected example presented during the session.

ADGM Academy's School of Digital Assets has been launched with the objective of creating a vibrant workforce based on the needs and requirements of the future.

The financial sector is undergoing continued disruption and change due to the advent of Digital Assets, requiring new skill sets and knowledge to support future development. As such, ADGMA seeks to support the growth of this vibrant sector by offering structured courses and programmes with internationally recognised institutions.

The School will focus on key verticals within Digital Assets which include:

- Metaverse
- NFTs
- Cryptocurrency
- Blockchain
- Decentralised Finance (DeFi)

The School of Entrepreneurship is committed to empowering aspiring entrepreneurs with the essential skills, knowledge, and practical tools needed to successfully launch, grow, and sustain their business ventures.

Through a carefully designed curriculum and hands-on learning experiences, the School supports participants at every stage of their entrepreneurial journey — whether they are developing an initial idea or seeking to expand an existing business.

Beyond training, the School fosters strong connections with leading public and private sector institutions, opening doors to a powerful network of potential investors, mentors, and industry experts.

By bridging education with real-world opportunities, the School of Entrepreneurship provides participants with the critical support and strategic partnerships needed to turn their business ambitions into thriving enterprises.

Future Entrepreneurs Programme Professional Certification

The School of Law aims to deliver top quality legal educational programmes to professionals looking to enhance their skills, widen their knowledge or attain a qualification.

Dedicated to excellence, the School of Law provides preparation for the Solicitors Qualifying Examination (SQE) through an innovative , flexible and effective approach.

Working alongside strategic partners will help identify and bridge the gaps within the legal industry and will cater to the ongoing and upcoming developments within.

Solicitor Qualification Exam 1 (SQE 1) Preparation Professional Certification

The new Solicitors Qualification Examination has recently become the principal route to qualification as a Solicitor (England & Wales). The new regime has greatly enhanced access to the qualification and represents a substantial opportunity for interested candidates in the Middle East.

There is an ongoing shift towards English Law governing most commercial transactions across the region. This is most evident in complex matters such as banking, project finance and construction which closely follow an English law model. In reflection of this, financial districts (including ADGM) have introduced English legal systems, including Courts. The Solicitor qualification has the potential to greatly enhance the career prospects of existing lawyers and those new to the profession.

Flexible

As per requirements

Course/ Qualifications Level/ Credits (if applicable)	N/A	Awarding Body (if applicable)	N/A

Sustainable finance plays a crucial role in shaping a resilient and responsible financial future by integrating Environmental, Social, and Governance (ESG) principles into investment and financial decision-making. It encompasses key areas such as climate finance, biodiversity preservation, and social impact, ensuring long-term economic growth while addressing global sustainability challenges.

The **School of Sustainable Finance** is committed to equipping professionals with the knowledge and skills needed to navigate this evolving landscape. Through executive training, specialised programmes, and professional certifications, we provide insights into the latest developments in sustainable finance, ESG integration, and climate finance.

Our programmes empower financial leaders to drive meaningful change and make informed investment decisions that contribute to a more sustainable and inclusive global economy.

Building ESG Capacity: Empowering Teams for Effective Sustainability Management | Personal Development Programme

This course aims to provide professionals with the knowledge and tools needed to build ESG capacity within their organisations, empowering teams to effectively manage and integrate sustainability into day-to-day operations and long-term strategies.

By the end of this 1-day course, participants will have gained a comprehensive understanding of ESG capacity building, its importance for organisations, and the steps needed to empower teams for effective sustainability management. They will be well-equipped to enhance their organisation's ESG capacity, aligning with regulatory requirements and meeting the growing expectations of investors and other stakeholders.

**1
Day**

Course/ Qualifications Level/ Credits (if applicable)	Course	Awarding Body (if applicable)	Certificate of Completion
Target Group	It is aimed for working professionals in regulation, banking and finance and insurance.

The UAE economic substance rules came into effect in April 2019. All UAE entities will need to assess whether they fall within the scope of the economic substance regulations, and, if so, how they will ensure to meet the requirements.

3
Days

Course/ Qualifications Level/ Credits (if applicable)	N/A	Awarding Body (if applicable)	National Open College Network (NOCN)
Target Group	Open to all		
Pre-Requisites	No mandatory requirements		
Learning Outcomes	Help business stakeholders in determining whether the UAE substance regulations apply to their business and how to ensure they can demonstrate the required compliance.		

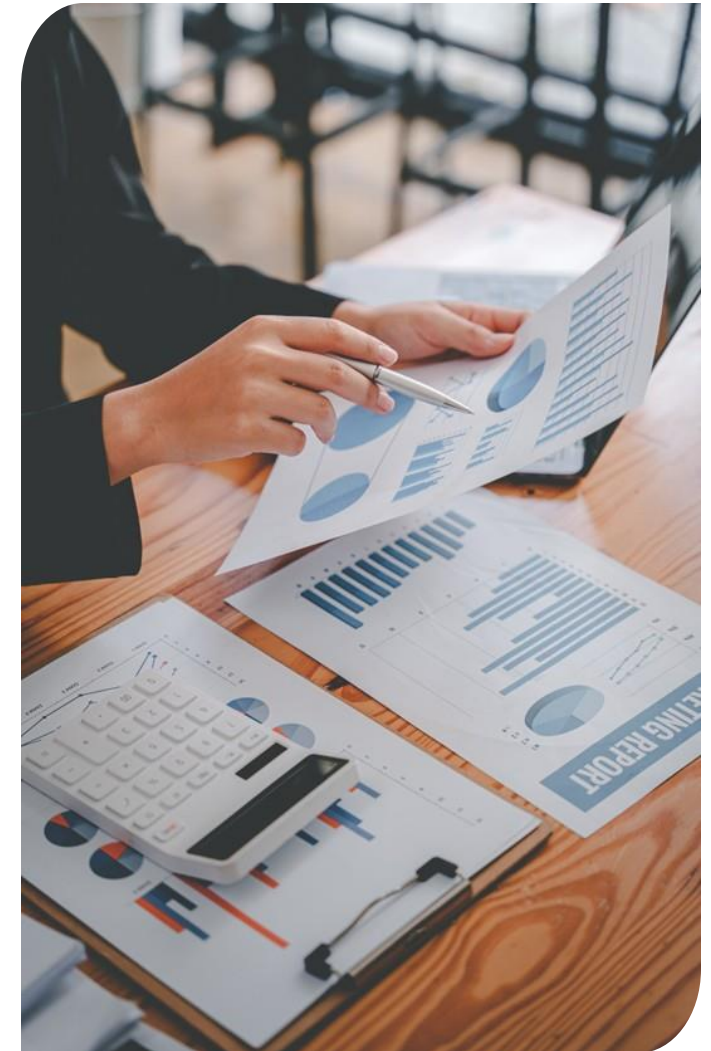

Foreign Account Tax Compliance Act (FATCA) Professional Certificate

The Foreign Account Tax Compliance Act (FATCA) is a U.S. law intended to combat tax evasion by U.S. taxpayers who hold investments in offshore accounts. Congress enacted FATCA in 2010 to address the fact that the U.S. Treasury loses an estimated \$100 billion each year to international tax-dodging schemes.

Under FATCA, U.S. taxpayers holding financial assets outside the U.S. must report those assets to the U.S. Internal Revenue Service (IRS), and foreign financial institutions (FFIs) must provide the IRS information about financial accounts held by U.S. taxpayers. FATCA imposes a substantial withholding tax on U.S. taxpayers and FFIs that fail to disclose the required information, making FATCA training that much more crucial.

Course/ Qualifications Level/ Credits (if applicable)	N/A	Awarding Body (if applicable)	National Open College Network (NOCN)
Target Group	Open to all		
Pre-Requisites	High School Certificate or above		
Learning Outcomes	Ensure users truly understand and recognise the issues of most importance to your business and learn to instinctively act to support them.		

3
Days

The key to an organisation's success is primarily based on adequate management of cash flows, liquidity and financial assets. Certain financial risks such as interest rate risk or currency fluctuations may hinder the ongoing operations of a company which is why the School of Treasury plays an important role.

It is aimed at developing risk management skills and ensuring appropriate financial planning. Additionally, the school will enhance technological competencies of participants since treasury management in today's world involves the usage of advanced systems and software.

Certificate in Treasury Fundamentals Qualification Professional Certification

If you are considering a career in treasury or finance, or have recently started in a treasury, or related, role, the Certificate in Treasury Fundamentals (CertTF) is the perfect qualification to equip you with the knowledge to ensure you get off to a great start. It is designed specifically for those working in treasury and those who may be working alongside, or advising, treasury professionals. It will provide insights into the world of treasury, its importance and key areas of focus, as well as providing an introduction to both financial markets and corporate finance. The contents focus on 'treasury essentials' and will provide an excellent starting point for anyone aspiring to become a treasury professional.

3-6
Months

The Dalio Market Principles Online Programme

Professional Certification

ADGM Academy is shaping the next generation of financial talent, with a strong focus on wealth and asset management, family offices, and investment excellence. As part of its ongoing efforts to build Abu Dhabi's reputation as a global financial hub, ADGMA proudly launched the School of Wealth and Asset Management, and with it, the introduction of the Dalio Market Principles Online Programme — the first of its kind in the region.

Developed in collaboration with the Wealth Management Institute and global investor Ray Dalio, Founder and CIO Mentor of Bridgewater Associates, the programme offers professionals across all sectors the opportunity to deepen their understanding of how markets and economies function.

Through two in-depth modules — Economic & Market Principles and Investment Principles — participants will explore time-tested insights, use powerful simulation tools, and develop their own investment approach in today's evolving global landscape.

Course/ Qualifications Level/ Credits (if applicable)	N/A	Awarding Body (if applicable)	ADGM Academy
Target Group	The programme is open to all UAE-based professionals across industries. Designed to be inclusive, it welcomes participants without specific entry requirements, offering a unique opportunity to deepen their understanding of economic and investment principles through a globally recognised curriculum.		
Pre-Requisites	There are no specific eligibility requirements.		
Programme Benefits	<p>Learn from a Global Leader: Gain access to the core principles and frameworks developed by Ray Dalio, based on over 50 years of real-world investment experience.</p> <p>Interactive Learning Tools: Engage with a generative AI tutor and portfolio simulator for hands-on, practical application.</p> <p>Cohort-Based Learning: Participate in a structured, time-bound programme with scheduled sessions and peer interaction.</p> <p>Community of Learners: Connect with a global network of professionals and peers on the same learning journey.</p> <p>Dual Focus: Deepen your understanding through two focused tracks — economic and market principles, and investment principles.</p>		

30
Hours

Skill Focused Programmes

 Artificial Intelligence	AI is extensively being used to replace repetitive tasks to impact process efficiencies leading to superior customer experience.	   
 Digital Transformation	Digital transformation is critical for any digital economy post Covid-19. Investing in digital transformation initiatives is guaranteed to provide both short and long-term benefits.	
 Cybersecurity	Risk increases exponentially in a digital world, making continuous improvement paramount. Both system and data protection are our key focus areas.	
 Blockchain	Data is being harnessed, mined & leveraged to make better intelligence driven decisions and predictive analytics is aiding enhanced forecasting capabilities.	
 Fintech	Digital technologies are causing necessary disruptions and creating unique opportunities for innovate solutions, services & business models.	

Digital skills are becoming increasingly critical in the new skills economy
